1. INTRODUCCIÓN

La presente memoria tiene como objeto poner de manifiesto los criterios de análisis y verificación estructural de una estructura de H°A° y metal prevista para un edificio de 2 niveles, cuyo uso será local comercial. En la presente memoria se verificarán las estructuras a las situaciones de carga últimas y de servicio.

2. BASES DE DISEÑO

El proceso de verificación y diseño se inicia determinando las cargas actuantes según los reglamentos vigentes correspondientes:

- CIRSOC 101/05. Reglamento Argentino de Cargas Permanentes y Sobrecargas de Diseño.
- CIRSOC 102/05. Reglamento Argentino de Acción del Viento sobre las Construcciones.

Luego se modela la estructura en un software en base al cálculo mediante elementos finitos, se obtienen las solicitaciones en barras, y se contrastan con las resistencias nominales establecidas en los siguientes reglamentos:

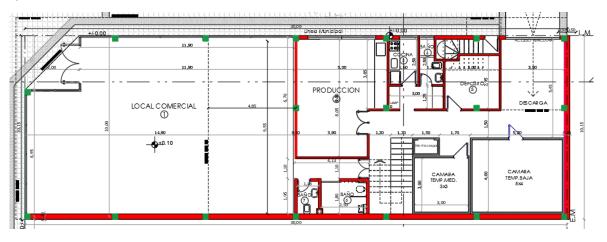

- -CIRSOC 201-2005. Reglamento Argentino de Estructuras de Hormigón.
- -CIRSOC 303-2005. Reglamento Argentino de Estructuras de Acero conformado en frío.

3. DISEÑO ESTRUCTURAL

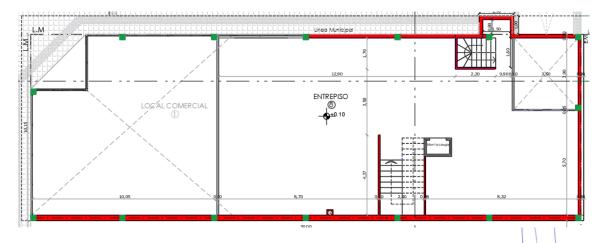

La estructura posee tres niveles, donde el primero se compone de bases aisladas y zapatas corridas, unidas a nivel de encadenado inferior mediante vigas de fundación, luego, un nivel de entrepiso compuesto de vigas y losas macizas, y un tercer nivel compuesto de encadenados donde apoya la estructura de techo.

Planos arquitectónicos:

Planta baja:

Planta alta:

-Niveles

Grupo	Nombre del grupo	Planta	Nombre planta	Altura	Cota
4	TR	4	TR	2.62	9.45
3	Enc Superior	3	Enc Superior	3.48	6.83
2	Entrepiso	2	Entrepiso	3.35	3.35
1	Enc Inferior	1	Enc Inferior	1.00	0.00
0	Fundación				-1.00

4. ANÁLISIS Y VERIFICACIÓN DE ELEMENTOS DE H°A°

- MATERIALES UTILIZADOS

- Hormigones

Elemento	Hormigon	fck (kp/cm²)	gc		Ec (kp/cm²)
Todos	H-20	204	1.00	19	214261

- Aceros por elemento y posición

- Aceros en barras

Elemento Acero		f _{yk} (kp/cm²)	дs
Todos	ADN 420	4281	1.00

- ACCIONES CONSIDERADAS

- Gravitatorias:

4.4. BASES:

Estos elementos deberán construirse sobre una capa de 10 cm de hormigón de limpieza de la misma calidad que la especificada para las bases. Se deberá fundar sobre suelo colorado, previamente compactado.
